

Meeh Climate Service: Service. Ensured.

WHAT DOES YOUR MAINTENANCE PLAN DO FOR YOU?

The following information is actual data from a Meeh Climate Service Maintenance customer depicting the invaluable data gained from having an ongoing Quantitative Payback Analysis.

Manufacturing plant

- 78 Different units / systems – average age 17 years
- 61 Compressors
- Roof Top Units, Split Systems, Air Cooled Chillers, Material Storage Vaults, Computer Room Units and Control Room Systems.

Three (3) year Maintenance History

- 47 units ran service free all three years
- 19 units had one minor service call in three years
- No equipment out of service for more than 24 hours*

Four (4) Years Repair Service History

- 5 Compressors Replaced
- 8 Units replaced on planned schedule / upgrades
- Repair service costs averaged less than \$0.60 per dollar of maintenance cost

*Units requiring replacement were out of service longer than 24 hours.

"A quality service program is measured by the extended life and reliability of the equipment under service. Management of the service program results in a long-range maintenance plan that projects reliability based on service experience and incorporates budgeting and planning. Together these qualities provide for the most reliable operating systems." --Louis Troha Jr.

What does this mean to you?

- \$ Lower operating cost
- \$ Lower maintenance costs
- \$ Higher efficiency
- \$ Lower equipment costs
